**CHOOSE THE BEST TIME TO CALL . . .**

Peaks in telephone traffic are reached between 9 and 11 o'clock in the morning, 1 and 3 o'clock in the afternoon and 7 o'clock in the evening. If you avoid these peak periods, you will get fewer busy signals and find folks more free to talk. This is especially worth remembering these days when production activities put such a load on telephone facilities.

Do not depend upon your Memory when calling a Telephone number

**Always Refer to the Directory**
